# Uptown Chicago to Have City's Largest Theater

TN KEEPING with the marvelous growth and increasing prosperity of Uptown Chicago, is the fact that this important district is to have the largest and most beautiful theater in the world. Already under construction at the northwest corner of Lawrence Avenue and Broadway, this great motion picture theater being erected by Balaban & Katz, is to cost three million dollars.

This latest Uptown achievement covers an area of forty-two thousand square feet, will have a seating capacity of nearly five thousand, and will be completed in April, 1925. In this "city within a city" there are twentythree splendid motion picture theaters conveniently located for the four hundred thousand residents, offering an excellent choice of fine entertainment.

These theaters have a combined

seating capacity of 241,989 persons. They represent a total investment of approximately seven million dollars.

The gross receipts of these twenty-three Uptown motion picture theaters last year is said to have been approximately fifty million dollars.

Just two blocks south and east of the site of Chicago's largest theater, in the very center of Uptown Chicago's Rialto, is located another Uptown achievement, the ONTRA, the largest and most beautiful cafeteria in Chicago.

Miss Dutton invites you who so keenly enjoy the better things of life, your guests and friends, to eat here seven days a week, breakfast, lunch and dinner, and enjoy

her excellent food in the midst of the most beautiful surroundings.

"Henry Ford said to this writer a couple of years ago—'Standard Oil is the most ably managed concern in the United States'."

Naturally such sweeping commendation is gratifying but if, as we suspect, and want to believe, Mr. Ford's remark was prompted by his knowledge that this Company is succeeding in rendering a superior service to the public, then it is doubly pleasing.

For service in its biggest, broadest inter-pretation is the principle governing all the activities of the Standard Oil Company (Indiana).

The Management of this Company construes the perfunctory manufacture and delivery of products as something less than service.

It is the whole-souled, enthusiastic per-formance of these functions that constitutes real service.

To gain a new and useful product from a single base—crude petroleum—without in any way affecting the quality of other useful products—that is service.

To maintain, unfailingly, a superior standard of quality—that is service.

To make it possible for the man in the remote places to get Standard Oil products with dependable regularity—that is service.

To produce an oil that will increase the revolutions per minute of machinery in other essential industries and thereby increase their output—that is service.

To manufacture petroleum products of a quality that will prolong the life and add to the power of the modern internal combustion engine—that is service.

To maintain a fair and equitable price for its products—that is service.

Skill in management of any business is mirrored in the service rendered. An organization which puts profits ahead of service cannot endure.

Firm in its conviction that the greater the service, the greater the profit, the Standard Oil Company (Indiana) looks to service as its chief concern.

# Original Antique and Reproduction Shown Side by Side

We are showing this sofa side by side with the Italian antique from which it was copied.

This antique was obtained from an antiquarian of Milan, who said he had found it in a villa near Bellagio on Lake Como and that it was made between 1725 and 1760. The reproduction follows faithfully its elaborate hand carving, but has been made deeper in the seat in order to permit the use of the deep down cushions in place of the high hard seat of the original.

Two chairs and bench have been made to accompany the sofa and the four pieces are priced at \$1,536. Covered in imported figured satin. The antique is not for sale,

THIS man is washing up at your plant before the noon whistle blows. You may not know him.

YET—he is cheating you of costly time. And our loss will be doubled before he leaves this

Daily, in scores of ways, even the most dependable employees waste many precious minutes. The loss in delay in starting work morning and noon and in early preparation for noon and night leaving, alone frequently averages 20 minutes per man per day. At fifty cents an hour, this means a waste of

\$50 per man every 800 working days—an annual loss of \$50,000 for the plant with 1000 employees.

Usually, this astounding waste can be traced to

"It saves me money-"

"That's why I burn Chicago Solvay Coke. I pay less per ton for it than you pay for hard coal and I get more heat per ton. It's a cleaner fuel—a sootless, smokeless fuel. There are no ashes worth sifting. It's all fuel.

There is no mystery about Chicago Solvay Coke. You burn to wherever you could burn hard coal. It requires little draft, starts easily, burns easily, holds fire overnight, it is light to handle—and is sale and clean."

Phone us now for the name of the fuel dealer nearest you who has Chicago Solvay Coke. Ask, too, for booklet—"The Fuel Without a Fault." Let us send a man to show you how easily and cheaply you can heat your home comfortably with this better fuel.

# An Insulated House ls Like a Thermos Bottle

Heat kept in-Cold kept out-and Fuel saved

FLAX-LI-NUM resists the pas-sage of heat like the walls of a thermos bottle. It makes houses warmer in winter and cooler in summer. Bottles up the heat in December and shuts it out in August. One inch of Flaxli-num in resistance to heat equals 16 inches of brick and mortar, or 27 inches of concrete. Think what such protection means to your walls and roof.

Flax-li-num simply applies the principle of the refrigerator and the thermos bottle to house

No forcing the fire; no mornings when the house just won't get warm; no cold floors upon which children may not play. li-num insulated houses burn 30

On Old Houses, Too

In winter the big heat loss occurs thru the roof. In summer, heat enters there, making the upstairs hot and sultry. Flaz-li-num is most needed, therefore, under the roof. At this point it

makes its greatest saving for you. Test after test, on actual houses, proves this fact.

You can build Flax-li-num into the roof of your present home and get these lower fuel bills and this all-weather comfort. Easily and cheaply applied. You can do it yourself.

Twelve Years Have Proved Its Value

Flax-li-num is not an experiment. For twelve years it has been used with great satisfaction to home owners. In the coldest part of the country it has kept homes comfortable and saved fuel, and in warmer sections it has provided equal protection against excessive summer heat.

You are entitled to this modern advantage. It adds only a tiny fraction to the cost.
Whether you build, buy or rent,
see that your home has this guarantee of comfort and economy.

# Why so Many National Advertisers Use the Cleveland Plain Dealer

Through this One Newspaper-at One Advertising Cost they can reach the buyers of Cleveland and the whole rich market of Northern Ohio

AST year 1800 national advertisers used The Plain Dealer to reach the buyers of Cleveland's prosperous 3,000,000 market.

> Of these, 896 used the Plain Dealer to the exclusion of all other Cleveland newspapers.

> In national lineage The Plain Dealer carried almost as much as both evening papers and the other Sunday paper combined—actually 49.8 per cent.

There is a very definite reason for this marked dominance.

Men who make a study of America's important markets and how to reach them have proved to their perfect satisfaction that The Plain Dealer has the buyers in Cleveland.

Cleveland differs from a great many other large cities in that it is not a commuting center. Consequently, over 90 per cent of all home delivered Plain Dealers remain in the home all day. Women as well

as men read it and are impressed by the sales messages it contains. This has proved out in definite, tangible results for products of every kind and every price.

Sales executives and advertising agents know, too, that The Plain Dealer with the largest circulation of any newspaper in Ohio, is a necessary adjunct to sales throughout the entire market of Northern Ohio. Here is a territory that holds 19 separate jobbing centers. And here too-as in Cleveland itself-The Plain Dealer is the home newspaper, the one big lever for increased business.

The Plain Dealer is so widely chosen by progressive sellers who seek intensive coverage at moderate cost.

If you have a sales problem in Cleveland or Northern Ohio-whether it be with jobber, dealer or consumer, or all three combined—strong, consistent advertising in The Plain Dealer will do the job.

No other Cleveland paper taps the buying power of this whole market. That is why

In the end the white man's courage won. The half-breed's fury gave way to the instability of racial mixture. A chance swing sent Jim reeling, his heels caught a small jos, and he went down. But as Rod sprang forward he scrambled to his feet and sourried away among the wigwams.

Rod turned to face the Indians. They had watched the struggle in silence, but with barbarous pleasure and unmistakable partisanship. Now they were cowed, though the lust for a white man's blood had not wholly died out. Behind them were wigwams, beyond the gloomy swamp. All about lay the north, the empty, forbidding wilderness, the granite shore, the wolf-jaw crests of the law, spruce crowned ridges, and for the first time in his life Rod expited in the raw savagery of it. The ugliness had vanished and he felt kinship with its limitive glory.

Tou men come up early and get your axes in the morning, he said analy in Ojibwa. "And don't take all summer to get in that wood."

THE DEVIL'S DISCIPLE":

BY FREDERICK DONAGHEY.

Shaw, himself, calls snopware—although I don't think he uses the word with reference to any of his own plays. He probably doesn't think much of this one now; but he is averse to injuring the mercantile values of his output.

... He has in it most of the things he derides when he writes about the plays of others, or about the theater in general. Men who are physical and facial opposites exchange coats, and thereby deceive their fellow-men. A bare-legged waif hangs about as a property for illustration of the hero's nobility. Dudgeon is any or all of the despised Shakspere's beloved black-guards: Antony, Gratiano, Faulconbridge, Kent, Petrucchio. The curtain is lowered to indicate a lapse of the statutory "several minutes."

And so-on; and it doesn't matter; and one remembers that Shaw has written the best of all the books in English about Ibsen, from whom he learned how good plays are mada.

New York City, last evening delivered the principal address at the dedication of the new community house of Free synagogue, the South Shore temple, 7211 Jeffery avenue. Dr. Wise expressed approval of synagogues in which there are no rented pews and no minimum scale of dues of members.

Dr. G. George Fox, rabbi of the South Shore temple, said that the congregation although only eighteen months old, had acquired property valued at \$160,000 and had last year a budget of \$24,006.

A marriage license was obtained at the county building yesterday by Alfred Morris Wolfs, son of Mr. and Mrs. Edward N. Wolfs of Colorado Springa, and Miss Vera Stock, daughter of Mr. and Mrs. Frederick A. Stock of 5477 Hyde Park boulevard. Mr. Wolfs gave his age as 23 and the daughter of the leader of the Chicago Symphony or chestra gave here as 21. Plans for an elaborate wedding at the Fourth Prespyterian church on April 8 were announced recently. Chicago.

We Meet a Millionaire.

NEW YORK -- (Special Correspond-nce.)—The scene was the marble to-

ence.]—The scene was the marble interior of the Greenwich Trust company in Greenwich, Conn. The time was saturday morning. And the chief actor was a milliconire.

He must have been a millionaire, because all the important people behind elegant marble railings and brass cages said helo to him and knew him. It has always been our ambition to set close enough to a real millionaire and remain there long enough to note the various elements of his costuming.

While pretending to write ourselves a dozen or so cheeks, we noted down the following on his costume:

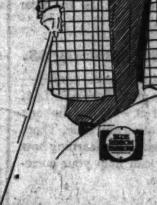

He wore knickers of camel's hair color with a camel's hair vest and cap to match. Fis jacket was a tan tweed, but differing 'n color from the knickers and yest.

His gelf stockings left the brown entirely. They were a light greenish gray or heather color. The shoes were plain brown oxfords.

He wore a white broadcloth shirt with collar attached, and a Scotch plaid four in hand in bright and dark red.

plaid four in hand in bright and dark red.

Over all he wore a chocolate brown topcoat with a large line self check. Here was a carefully laid color scheme with brown sad tan as the foundation, the green stockings to break the monotony of all one color, and the bright necktie to lighten what otherwise might have been a somber effect due to the dark colors employed.

WHEN a nationally known manufacturing concern erected this machine shop and foundry a few years ago, they built well. They placed their machine shop next to their foundry on a plot with wide frontage on three streets, giving them a unit of 80,000 square feet of splendid, daylight space.

Because they have removed to a larger plant, their properties in the plaza section at the Brooklyn end of the Manhattan Bridge, in the heart of the Metropolitan District, are being liquidated at less than reproduction value.

Gen. George Teheslawsky, formerly a cavalry division commander in the Imperial Russian Army, is now an employee at Hawthorne. Descendant of a long line of Russian soldiers, General Teheslawsky served for twenty-seven years in the Russian army, and for one year with the interallied commission for the repatriation of Russian prisoners of war. With this latter body he was senior allied officer over Bavarian camps.

Since coming to America a few months ago, General Teheslawsky has worked in one of the Michigan automobile plants and in one of the department stores in Chicago before joining the Western Electric Company. He hopes within a year to bring his wife, three little girls, and baby boy to Chicago.

At least two Hawthornites are certain of competing in the Olympic Games at Paris this summer-Cyril Coaffee, as a member of the Canadian track aquad, and Johnny Vorrea, with the United States wrestling team. Coaffee has equalled three world's records during his track career. While making his debut in Ganads he fairly burned up the cinder paths in the provinces. In 1922 he set three new Canadian marks and tied two world's records. He stepped the 100 yards in 9 3/5 seconds and shares the world's mark at that distance with Charles Paddock; Applegarth, of England; Howard Drew, and Kelly, of New York. He also succeeded in tieing the 120-yard dash record set by Reggie Walker, of South Africa, back in 1908. In his latest record-breaking feat, Coaffee tied the 70-yard dash mark of 7 1/5 seconds held by Loren Murchison. Vorres, Hawtherne's other Olympic celebrity, holds the National A. A. Study Cable Making

P. R. Ekdahl and A. M. Anderson, of the Sieverts Cable Manufacturing Company, Stockholm, Sweden, are among the latest arrivals at Hawthorne. They plan to spend three months at the Works studying toll cable manufacture. Paul Gay and Marcell Le Due, both of the Société Anonyme Lignes Telegraphiques et Telephoniques, Paris, are also in Chicago on a similar mission. Others who visited Hawthorne recently to study Western Electric manufacturing methods included Prof. Allen B. Forsberg and 80 students from the University of Chicago's School of Commerce, and Prof. O. W. Walter and six engineering students from the University of Okiahoma.

Rental Income: In earnings behind the bonds this issue excels. This building will earn four times as much money as the owner will require to pay the bond interest on the entire issue, before any of the serial bonds are paid off. These earnings will also retire the serial bonds and still leave a large surplus as a margin of safety.

Bear in mind, too; that under our system these earnings are mortgaged for the bondholders just as surely as the land and building. Under the Trust Deed the owner of the property must deposit each month with H. O. STONE & CO. a sufficient portion of his earnings to pay both principal and interest to the bondholders when due.

Redoumable at pay and secreted interest on February 1, 1934

Legal investment for all fiduciary and trust funds under the furisdiction of the Federal Government and may be accepted as security for Postal Savings and certain deposits of Government funds.

Hr. John H. Krafft, Vice-President and Managing Director of the Bank, summarized as follows his letter regarding this issue:

Security These bonds are direct obligations of The Columbus Joint Stock Land Bank of Columbus, Ohio, formerly known as The First Joint Stock Land Bank of Cleveland, Ohio, and are collaterally secured by either first mortgages on farm lands or U. S. Government bonds or cartificates of indebtedness. Mortgages are secured upon improved farms at not exceeding 50% of the appraised value of the land and 20% of the appraised value of permanent insurable improvements. The Capital Stock of the bank with double liability gives further security.

Management and Territory The Columbus Joint Stock Land Bank was originally chartered as The First Joint Stock Land Bank of Cleveland, Ohio, February 23, 1922. By amendment to its charter effective January 1, 1924, the name was changed to its present one and the location of its principal office from Cleveland to Columbus. The active management and policy of the bank are unchanged, its board consisting of men of long and successful experience in farm mortgage banking. The burritory served, Ohio and Michigan, is one of diversified or general farming. Soil, climatic and marketing conditions are exceptionally good and land values seem. The Loans of the bank to date represent only 36% of the appraised value of the security as fixed by Federal Appraisers.

Tax Exemption These bonds are prepared and engraved by the Treasury Department. The act under which they are issued provides that! Farm Loan Bonds issued under the provision of this act shall be deemed and held to be instrumentalities of the Government of the United States and as such, they and the income derived therefrom shall be exempt from Federal, States Municipal and Local Taxation.

By a decision of the Supreme Court of the United States, rendered February 28, 1921 the constitutionality of this Act and the tax exemption features of these bonds were fully interest.

We offer these bonds, when as and if boned and received by un Price 101 and Accrued Interest To Yield 487% to 1934, and 5% thereafter

# A Man With a **Thousand Dollars**

A MAN with a thousand dollars walked into the old offices of S. W. STRAUS & Co. in Chicago about 20 years ago.

He invested his carefully saved susplus in a first mortgage security, explaining that he wished to reinvest the money when the mortgage was due and build up a permanent investment fund, as a guarantee against old age and in order to leave something behind him.

Today this man has more than \$50,000 invested in sound, first mortgage securities. He has never earned a very large income; never made a "lucky" financial stroke, but he has saved and invested, reinvested his interest and maturing funds and added what he could from time to time. Today he is known as a substantial, successful citizen and faces the future without fear.

What this man has done you can do too. The important thing is to start right and select conservative, safe securities for your savings fund.
